C:\Windows\system32\cmd.exe

Composer version 2.8.8 2025-04-04 16:56:46

Usage:
  command [options] [arguments]

Options:
  -h, --help                Display help for the given command. When no command is given display h
  -q, --quiet               Do not output any message
  -V, --version             Display this application version
  --ansi|--no-ansi         Force (or disable --no-ansi) ANSI output
  -n, --no-interaction     Do not ask any interactive question
  --display-timing          Display timing and memory usage information
  --no-plugins              Do not load the plugins
  --working-dir             The directory where composer should execute the
                           scripts defined in composer.json file.
                           If not specified, use the given directory as working directory.
  --cache-dir              The directory where composer should cache its
                           data. If not specified, use the given directory as cache
                           directory.
  --verbose                 Increase the verbosity of messages: 1 for normal output, 2 for more ve

Let's get started

Laravel has an incredibly rich ecosystem.
We suggest starting with the following.

- Read the [Documentation](#)
- Watch video tutorials at [Laracasts](#)

[Deploy now](#)

```
C:\Windows\system32\cmd.exe
(c) Microsoft Corporation. Todos los derechos reservados.

C:\Users\MICHELLE>node -v
v21.7.3

C:\Users\MICHELLE>
```
